

JK Meurer COVID-19 Plan of Action:

- We are closely monitoring the rapidly changing public health environment and following sanitary protocols recommended by the CDC as well as OSHA.
- Employees have been instructed to follow CDC recommendations regarding proper hand washing and sanitization.
- We are encouraging field employees to continue wearing required personal protective equipment, including gloves and protective eyewear.
- We have instructed our employees to remain home if they have any doubt that are ill and if they are showing any signs of sickness. We have recommended they contact their local health office if they experience any symptoms.
- We are encouraging office and sales personnel to limit travel and conduct meetings virtually, when possible.
